

Data & AI Case Study

Mapped to two Wuerth internship roles

DISCLAIMER: Independent analysis based on PUBLIC information only. NOT affiliated with, endorsed by, or reviewed by the Wuerth Group. No internal, confidential, or proprietary Wuerth data or systems were used. Wuerth-scale figures are public and approximate. All portfolio performance numbers are measured on SYNTHETIC / self-generated data and demonstrate method only -- they are not claims about Wuerth's real business. The one real-data project (retail-analytics-real) is in progress and contributes no results yet.

This is my independent case study. I mapped the requirements of two Wuerth Data & AI internship postings to work I have already built and measured in my own portfolio (now 16+ repositories, including two warehouse-logistics flagships and a supply-network optimizer). The euro and accuracy figures throughout are on synthetic data (the one real-data project is in progress, with no results cited) and exist to prove the methods work and are measurable -- not to forecast Wuerth outcomes.

Job #1 -- (Agentic) Automation with Low-code Platforms

Agentic AI workflows, low-code (n8n / Power Automate), connecting systems & APIs, document automation, ROI, rapid prototyping.

Job #2 -- Data & AI Analytics

BI / Power BI, KPI dashboards, forecasting & predictive analytics, Python & SQL, data modelling, turning data into decisions.

Who Wuerth is (public info)

Wuerth (public profile, approximate): a large family-owned German-HQ group in assembly/fastening and industrial MRO distribution -- ~400+ companies in 80+ countries, ~87,000 employees, ~EUR 20B+ revenue, a catalogue in the millions of articles, multi-channel (field sales, branches, e-commerce, e-procurement/EDI, ORSY inventory systems). A business that runs on assortment, pricing, availability, logistics, and high-volume transactional documents -- a natural fit for applied Data & AI.

DISCLAIMER: Independent analysis based on PUBLIC information only. NOT affiliated with, endorsed by, or reviewed by the Wuerth Group. No internal, confidential, or proprietary Wuerth data or systems were used. Wuerth-scale figures are public and approximate. All portfolio performance numbers are measured on SYNTHETIC / self-generated data and demonstrate method only -- they are not claims about Wuerth's real business. The one real-data project (retail-analytics-real) is in progress and contributes no results yet.

Opportunity map (summary)

Wuerth business area (public-info) -> Data/AI approach -> repo + measured result (synthetic)

Area (public-info)	Approach	Repo	Result (synthetic)
Procurement / assortment / cross-sell	MILP vs greedy; Apriori/FP-growth	revops-optimizer, market-basket-analysis	MILP > greedy; 254 rules, top lift 2.41
Pricing & margin	Elasticity + leakage; endogeneity fix	sales-kpi-analytics, ml-models-lab	EUR2.6M leakage lever; bias +1.52 -> +0.03
Inventory / replenishment	Newsvendor + forecast	distributor-intel-platform, ml-models-lab	MASE 0.38; MASE 0.987 / RMSSE 0.948 (beats naive + Holt-Winters)
Sales KPIs & analytics	KPIs + rolling-origin CV	sales-kpi-analytics	MASE < 1; exec PDF
Logistics / routing	OR-Tools CP-SAT VRP	route-optimizer	4.6% / 31% savings
E-procurement automation	Agentic + n8n low-code	agentic-automation-lab	~EUR625k/yr modelled
Document processing	Agentic RFQ/invoice extract	doc-extract-agent	~EUR145k/yr modelled
Customer retention	Decline + churn classifiers	revops-optimizer, ml-models-lab	ROC-AUC 0.99; churn ECE 0.197 -> 0.021
Warehouse / intralogistics (new)	Digital twin + slotting + DES + packing	logistics-flow-studio, logistics-digital-twin	-48.6% pick travel; slotting -44.2%; fill 2.0% -> 30.2%
Supply-network design (new)	Facility MILP + flows + safety stock	supply-network-opt	-21.2% cost vs greedy; stock -65.7% / -80.1%
Real data (in progress)	Cleaning + RFM + leakage-safe CV	retail-analytics-real	in progress; no results cited (real data)

DISCLAIMER: Independent analysis based on PUBLIC information only. NOT affiliated with, endorsed by, or reviewed by the Wuerth Group. The one real-data project (retail-analytics-real) is in progress and contributes no results yet.

Job #1 -- (Agentic) Automation with Low-code

Every posting requirement -> repo + artifact + measured proof (all synthetic data).

Requirement	Repo / artifact	Proof (synthetic)
Build AI-agent workflows	agentic-automation-lab	agentic tool-use loops
Low-code (n8n / Power Automate)	agentic-automation-lab: n8n/rfq_intake_agent.json	RFQ-intake agent; ~EUR625k/yr
Visual / flow-based building	agent-flow-studio	flow builder; ~EUR47k/yr
Connecting systems / APIs	agentic-automation-lab connector layer	agents call external APIs
Process automation (back-office)	doc-extract-agent	RFQ/invoice -> structured
Document intake / understanding	doc-extract-agent	extract + validate; ~EUR145k/yr
Rapid prototyping	agent-flow-studio, agentic-automation-lab, logistics-flow-studio	runnable prototypes incl. an installable offline PWA
Show automation ROI	automation-roi-explorer	EUR383k/yr net modelled
Python engineering	all automation repos	Python throughout
Stakeholder communication	automation-roi-explorer	business-readable ROI views

The one real-data project (retail-analytics-real) is in progress and contributes no results yet.

Job #2 -- Data & AI Analytics

Every posting requirement -> repo + artifact + measured proof (all synthetic data).

Requirement	Repo / artifact	Proof (synthetic)
BI / Power BI	revops-optimizer: powerbi/DAX_measures.md	DAX pack + 3-page report
KPI dashboards / metrics	sales-kpi-analytics	KPI layer + exec PDF
Predictive analytics / forecasting	sales-kpi-analytics; ml-models-lab global forecaster	MASE < 1; MASE 0.987 / RMSSE 0.948 beats naive + Holt-Winters
Forecasting rigour	distributor-intel-platform	MASE 0.38 (9 rolling folds)
Python for analytics	sales-kpi-analytics, revops-optimizer	end-to-end pipelines
SQL / data modelling	sales-kpi-analytics SQL set	spend analysis queries
Excel-level tabular analysis	sales-kpi-analytics	spend breakdowns
Optimization / prescriptive	revops-optimizer; supply-network-opt; logistics-digital-twin	~EUR160k/yr; -21.2% cost vs greedy; fill 2.0% -> 30.2% (CP-SAT proof)
Elasticity / statistical modelling	revops-optimizer; ml-models-lab	ROC-AUC 0.99; elasticity bias +1.52 -> +0.03; churn ECE 0.197 -> 0.021
Data into business decisions	sales-kpi-analytics; market-basket-analysis	EUR2.6M leakage lever; cross-sell recs, top lift 2.41
Market-basket / cross-sell	market-basket-analysis	Apriori + FP-growth from scratch; 224 itemsets, 254 rules; 18 tests
Classification / anomaly detection	ml-models-lab	SKU macro-F1 0.963; AE PR-AUC 0.963 vs PCA 0.951 (PCA default)
Warehouse / intralogistics	logistics-flow-studio (WarehouseTwin); logistics-digital-twin	-48.6% pick travel; ABC ~21% > random; slotting -44.2%; DES -76.1% / -66.5%
Logistics / ops analytics	route-optimizer; supply-network-opt	4.6% / 31% savings; safety stock -65.7% / -80.1%
Real, messy data (in progress)	retail-analytics-real (UCI Online Retail II, real data)	cleaning + RFM + leakage-safe CV; no results cited yet
Present to decision-makers	revops-optimizer exec deck	exec narrative deck
